

DRAPE SPECIFICATIONS COMPARISON

BANJO

Banjo is the industry standard fabric for the trade show industry. Made from polyester, Banjo is available in a wide variety of colors. It is inherently flame resistant and has an opacity of 50-60%.

POLY PREMIER

Poly Premier is a versatile fabric commonly used in the event industry for backdrops. A staple of the event industry, this fabric has a more upscale, linen look and feel with a matte finish. Poly Premier can be used in diverse applications from trade shows to event design, is inherently flame resistant and has an opacity of 60-70%.

SHEER (VOILE)

Sheer, also known as Voile, is a popular fabric choice with weddings and special events. Utilized in ceiling swags, column wraps, and for layering with valances and multi-drape setups, Sheer is a very translucent specialty product.

PERFORMANCE VELOUR

Performance Velour is available is a 21oz. 100% polyester fabric and is among the highest quality fabric used for events. This fabric is more upscale and has both sound dampening and blackout qualities.

COMMANDO

Commando is a 100% polyester fabric and is the top choice for blackout drape on a budget. This fabric is a low cost, light weight alternative to Performance Velour and can successfully be used for blackout or masking in the event industry.
